Dear Friends, dear Colleagues,

We are really pleased to invite you to the next International Symposium on HIV and Emerging Infectious Diseases (ISHEID), which is scheduled on May 10-12, 2023, in Avignon, France, at the Palais des Papes.

Scientific progress relating chronic viral infections has paved the way to new therapeutic approaches, alleviated treatments and a well-established frame of prevention.

Emerging infections have imposed the urgent need for molecular surveillance and solid scientific preparedness.

Wars and socio-political changes have instituted the “One Health” concept in our everyday lives.

ISHEID 2023 will harbor timely presentations on all these health concerns and ascertain the legacy through debates among experienced and younger investigators, with sole priority the emergency of networking and establishment of an efficient research web.

We look forward to seeing you in Avignon, in May 2023.

Alain LAFEUILLADE

Christina PSOMAS

Patrick PHILIBERT
